

The primary purpose of the Intertie will be to allow for operation and maintenance activities at the Tracy pumping plant and fish facility, the Delta-Mendota Canal, and the O'Neill pumping plant and intake canal.

The Intertie would be used in a number of ways to accomplish the project's objectives:

- 💧 Maintaining and repairing CVP Delta export and conveyance facilities.
- 💧 Providing operational flexibility to respond to CVP and SWP emergencies.
- 💧 Meeting current water supply demands.
